JOB DESCRIPTION

Junior Civil Engineer | Sample Job Posting

Department: Engineering & Construction | Experience: Entry-level

ROLE OVERVIEW

We are seeking a junior civil engineer to support site activities, drawing reviews, measurement records, and quality and safety checks under the guidance of experienced engineers.

REQUIRED SKILLS

Civil engineering fundamentals, AutoCAD, reading engineering drawings, quantity estimation, surveying, MS Excel, documentation, communication, teamwork, and awareness of construction site safety.

KEY RESPONSIBILITIES

- Assist site engineers with daily progress tracking and work inspections.
- Review basic plans, elevations, and engineering drawings for coordination.
- Support quantity take-offs, measurement sheets, and material records.
- Maintain site documentation and prepare progress reports.
- Follow quality-control procedures and workplace safety requirements.

PREFERRED QUALIFICATIONS

Bachelor's degree in Civil Engineering or a closely related discipline. Academic projects or internship exposure to AutoCAD, surveying, concrete technology, or site work is an advantage.
