JOB DESCRIPTION

Junior Food Technologist / Quality Assurance Associate | Sample Job Posting

Department: Quality & Product Operations | Experience: Entry-level

ROLE OVERVIEW

The junior food technologist will support quality checks, food safety documentation, sample handling, and process hygiene activities under the guidance of quality and production teams.

REQUIRED SKILLS

Food technology fundamentals, quality assurance, food safety, HACCP concepts, GMP, hygiene and sanitation, sample preparation, sensory evaluation, laboratory documentation, MS Excel, communication.

KEY RESPONSIBILITIES

- Assist with routine quality checks and sample identification.
- Maintain accurate quality records, checklists, and batch documentation.
- Follow hygiene, sanitation, and good manufacturing practice procedures.
- Support basic sensory evaluation and product quality observations.
- Report deviations and incomplete records to the quality supervisor.

PREFERRED QUALIFICATIONS

Bachelor's degree in Food Technology, Food Science, or a related field. Academic laboratory work or internship exposure to food safety and quality systems is an advantage.
